DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 3, 4, 6, 7, 10-13, and 15-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has amended the specification and claims to specify a combination of glycerol solution, agar solution, polymeric glue *and* a soluble polymer, whereas the previous version of the specification and claims only specified *or other* soluble polymers. The change from "or" to --and-- is a clear change in scope of the claimed subject matter. Nothing in the specification appears to give any support for the specified combination of four materials in the hydrogel. The original recitation at page 14 would appear to give the impression that the soluble polymer was to be in lieu of one, some, or all of the other three recited substances (see page 2 of the previous office action). This is further reinforced by the various examples 1-8. In particular, examples 1, 4, and 5 specify the presence of glycerol, but none of the other claimed materials. Examples 6 and 7 specify polymeric glue, presumably in lieu of the previous glycerol solution. Finally, example 8 specifies the use of a soluble polymer, presumably in lieu of the previous glycerol solution and polymeric glue. There is nothing in the specification to indicate that all four claimed elements would be combined to form the hydrogel. Because patentability is now

hinging on the specified composition, clarification as to how amended page 14 and amended claims 10 and 16 would have been supported by the originally filed disclosure is requested.

Allowable Subject Matter

3. Claims 3, 4, 6, 7, 10-13, and 15-18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, first paragraph, set forth in this Office action.
4. The prior art does not disclose nor render obvious the claimed combination of glycerol, agar, polymeric glue, and soluble polymer in claims 10 and 16, but clarification of how the specified composition was supported by the originally filed disclosure is necessary.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
